CAPITAL REQUIREMENTS

TechNova needs an initial capital of ₱500,000 to start the business. This money will be used to build the platform, purchase software tools, create learning content, and promote the service.

FUNDING SOURCE

The background of the slide features a collage of business-related items. At the top right, a laptop is partially visible. Below it, there are several sheets of paper. One sheet displays a line graph with multiple data series over time. Another sheet shows a bar chart with blue and yellow bars. There are also two pie charts; one is divided into four segments with percentages like 24%, 22%, 24%, and 21%, and another is divided into three segments with percentages like 31%, 11%, and 48%. A yellow spiral-bound notebook with a blue pencil resting on it is in the lower right corner.

The capital will come from different sources:

Personal savings-
₱200,000

ANGEL INVESTOR-
₱200,000

SMALL BUSINESS LOAN
OR GRANT- ₱100,000

EXPENSES ALLOTMENT

The startup funds will be used for:

Platform development-
₱180,000

Technology tools and
software- ₱100,000

Marketing and
advertising- ₱120,000

Content creation and
workshops- ₱60,000

Legal and miscellaneous
expenses-₱40,000

MONTHLY BUDGET

Estimated monthly expenses:

Platform maintenance -
₱20,000

Marketing- ₱25,000

Trainers and content creators-
₱30,000

Software subscriptions-
₱15,000

Other expenses-₱10,000

Total Monthly Expenses:
₱100,00

Expected income from ₱500
members paying 300 per
month:

Monthly revenue: ₱150,00
Monthly profit: ₱50,000

A photograph showing several hands in business attire interacting with large wooden gears on a table, symbolizing teamwork and business strategy. The image is partially obscured by a blue diagonal overlay.

ROI FORECAST

With a monthly profit of ₱50,000, TechNova can earn about ₱600,000 per year. The initial investment of ₱500,000 is expected to be recovered within 10–12 months, making the business profitable within the first year.
